Operative since 1997, it has 100 students enrolled in the first year (of which 50 with tuition fee).

Objectives: To respond to the need felt for urban planners trained along with building designers, so that the two directions of study should meet the urban design field.

Sections
Bachelor – Urban and Spatial Planning
  – Landscape Design and Planning

Master – Urban Design;
  – Urban Management;
  – Spatial Planning and Regional Development;
  – Urban mobility;
  – Landscape and Territory
  – Planning and Public Politics

Diploma (Bachelor) Urban Planner
The master program addresses the urban planners and other professionals such as architects, engineers, traffic planners, economists, geographers, sociologists, historians in order to achieve the credentials to join the Romanian Register of Urban Planners.
Curriculum

The evaluation system is based on both marks and credits (inter and intra-transferable).

The curricula is structured according to the two cycles of studies (8+4 semesters):
- 8 semesters (first cycle) are dedicated to the basic general knowledge (theory and design practice) interrelated with the courses of Faculty of Architecture.
- In parallel, the formation is focused on the two sections: Urban and Spatial Planning, Landscape Design and Planning

The educational process is mainly targeted to the urban project; therefore, the developing of specific research and conception skills and techniques becomes very important. Enhancing the horizon of comprehension of the urban space and territory through multi-disciplinary approaches (perspectives: historical, geographical, social, technical, demographic, cultural, economic etc.) represent the most important means.

The apparently distinctive activities - courses, seminars, debates, exercises, studies in the design studios etc. - are all channeled to link urban design and urban planning with the drawing up of urban projects.

The concept and the curriculum for the Faculty of Urban Planning has been elaborated by the Urbanism Departments, which is mainly in charge with the profile studios, and the tutorial activity for the diploma work.

Admission

Admission to the first cycle – based on testing the understanding of the urban phenomena and the ability to graphically express this knowledge in a exam test.
Admission to the second cycle – written exam oriented to each specialization, based on a list of pre-requested subjects accompanied by a selected bibliography.

According to the agreements of the Ministry of Education, Research, Youth and Sports overseas applicants are not obliged to sit for the entrance exam, however an interview follows.
They have to apply until the 15th of September. For first cycle is required a High-school Leaving Examination Diploma internationally recognized. For second cycle is required Bachelor Diploma.

Useful information
All compulsory courses are attended in Romanian. It is possible for some optional courses, seminars, work-shops or studios to be held in English or French.

Calendar
The academic year begins on October 1st and lasts until July. There are two semesters of 14 weeks each, with Christmas, February (between semesters) and Easter vacations. At the end of each semester there is an evaluation session. The graduate exam is due for July - the first cycle (Bachelor), and for October - the second cycle (Masters degree)

Enrolment and grants
There are subsidized and tuition places, both for the Romanian and overseas applicants. There is also a number of tuition places established by the Senate of the University.

Miscellany
• The University has two dorms with a total capacity of 500 places. The accommodation fee is 45 $/month/room.
• The University’s library contains more than 200,000 titles in books. Architectural, technical and design magazines are up to date by annual subscription.
• We have video equipment and projectors for courses and conferences, a construction materials laboratory and a CAD-CAM laboratory equipped of 100 computers, a 3D scanner and a 3D plotter.
• There is IT equipment in all chairs, with a special department for the computer aided design skills development at the Chair of Representation and Design.
• The facilities include a sports hall, festivities hall and exhibition hall on the site.
• There is a long tradition in our school for students to take study trips in Romania and abroad, usually during the Easter vacation.

"ION MINCU" UNIVERSITY OF ARCHITECTURE AND URBAN PLANNING BUCHAREST, ROMANIA
Present position
PhD – Associate Professor, Dean of the Faculty of Urban Planning, at “Ion Minucu” University of Architecture and Urban Planning, Bucharest

Education
- NTU - Nanyang Technological University Singapore
- Master's Degree in Architecture at IMUAU, Bucharest

Memberships
- Graduated as architect at IAIM, Bucharest
- 2004-present; 2011-2012: Member of RUR and of the Superior Council of RUR
- 2009-present: Member of AESOP / CoREP – Romania’s representative
- 2000-present: Honored Member of SEPOX – Association of Urban Planners of Greece
- 2011: Member of OAR – Romanian Order of Architects
- 2010-present: President of REA – Reseau des Ecoles, d’Urbanisme et du Paysage de la France, Europe Centrale et Orientale

- domain: urban history

Publications
2011

Professional
Activity
2004 - 2011
Architect, head of Spatial Planning Department, Temporary Managing Director of the Urban and Metropolitan Planning Center of Bucharest Municipality
From 1952 to 1997 it functioned under the name ‘Ion Mincu’ Institute of Architecture (IAM). The recent change of the name into IMUAU, corresponds to the new direction clearly taken by the school.

IMUAU is located in the very core of the city of Bucharest, along one of the main north-south boulevards, and is situated across from the University of Bucharest, the oldest academic structure in Romania, and in front of the National Theatre. The IMUAU building occupies a whole urban block of 8000 sq. m. Between IMUAU and the boulevard lies the University Place, a popular venue in the modern city life, recently has become a token of the post-communist civil society, since it still bears the marks of the 1989 Revolution and of the anti-communist movements inscribed on IMUAU’s very walls.

The three wings of the present building illustrate distinct moments of the modern history of Romanian architecture, but also of the evolution of the School: where the building itself is concerned, from the endeavors to define a national style (the old 1914-1927 wing designed by Grigore Cerchez, one of the school’s first professors) to Modernism; as for the School, from the enthusiastic orientation towards the affirmation of a new Romanian culture to its fading into a nationalist conservatism, from the similarly enthusiastic embracing of the modernist credo to its failure in front of a reality richer in lights and shades.

As much as we could criticize the architecture of the building, it entered the memory of the people of Bucharest, and the urban spaces delimiting it are very popular and often house cultural happenings, book fairs, street exhibitions and concerts, etc.

PhD Professor Architect E. B. Popescu
President of “Ion Mincu” University of Architecture and Urban Planning, Bucharest
